The data shown therefore comes from reliable sources. Nevertheless, we do not offer any guarantees as nominal costs and market elements are unpredictable and at the same time have to be reliable.

In addition, the data presented in this article is not to be considered a recommendation or idea of any kind by management's speculation or exploitation. It is neither recommended nor mandated to invest resources into any organization or token solely based on the data provided in the paper. Careful inspection should be undertaken before any such venture and will be assumed full ownership, through a single financial plan.

# FOREWORD

Currently, the BSC market is clearly the most widely used DeFi market. It is evident that new businesses are constantly being added to the organization. The network quickly grew due to its fast exchange times and low gas fees, which gave it the upper hand. Hippo Inu is the latest extension to this rapidly expanding network. Due to the special dynamics it provides, the stage has established itself well in different areas of the organization. Nonetheless, changing to a BSC organization will increase acceptance.

Hippo Inu is a decentralized live image exchange platform. It's an amazing deal Covenant gives clients unlimited power over how their funds are handled. You can earn rewards by tokenizing tokens. Hippo Inu native token that can be used to make changes on stage. Voting is basically as important as changing calculations and choosing how revenue is generated. Let's be honest, the Hippo people The Inu people group has an extraordinary ability to solve better ideas while pursuing decision-making impact on the stage. Hippo Inu plans to decentralize the market by introducing the latest currency task. The Hippo is now known to increase its contribution to the field and fate exchange.

# INTRODUCTION

Programmatic market creator with NFT utility, cross-chain tokenization and spot trading stage on Binance Smart Chain. Hippo Inu is a cross-chain meme token and spot exchange stage to buy any meme token. It is based on Binance Smart Chain. Is the framework of the smart contract BSC on the chain, considering the consistent items. Each pair of Hippo dogs owns a storage pool that contains two resources and provides liquidity to them. These two resources maintain the immutability that the stored results cannot be exhausted. Merchant pays 20 premise focus exchange fees resulting in 15 premise focus charges Liquidity provider and 5 premise point fees will be used to purchase replacement tokens in addition, composing it. The contract cannot be re-established. The hippo dog convention allows the production of inconsistent Bep20/Bep20 matches, rather than supporting pairings between Bep20 and BNB.

Hippo is trying to make progress on the most important contributions of yield cultivation by basically keeping up with its special position in the market, namely, decentralized image trading, multi-chain tagging and

management. This is mainly to complete the cooperation with our customers.

## **THE OPERATION OF THE SPOT TRADING PLATFORM**

Offering our live image resource as the first currency project, we empower us to locally provide liquidity to the pool for consistent exchange.

### **As a buyer:**

As a trader, you'll explore your positive resources and meme tokens in Hippo and beyond. On the site, you can trade on stage for an ongoing cost.

### **As a seller:**

As a seller as a dealer, you can short the market. In this particular method, the merchant can push to sell its meme tokens and resources, and when the cost drops, the dealer will actually want to profit from it

# MARKET ANALYSIS

Computerized market creators trading the market itself is a huge industry of different encrypted networks. Almost all blockchains transact here and there with their customer base. Like any other major blockchain, Binance Smart Chain also has various transactions on stage definitely because of its higher transaction throughput and speed. Hippo Inu competitors on Binance Smart Chain include pancakeswap, panda trade, jet swap, ape swap and many others, which are not explicit about meme tokenization. Market Transformation of hippos has always been very important. Here comes the hippo dog. Pay special attention to your request.

This DEX has some expertise in meme tokens. From tokenizing these meme tokens to exchanging them with multi-chain highlights. Dogecoin, Shiba Inu and Doge On Mars are managing the crypto-verse with expected market caps of \$29.46B, \$22.24B, and \$764.08M respectively.

## TECHNICAL SPECIFICATIONS

### Use of constant product formulas

A liquidity pool is a shrewd protocol that holds at least two tokens and licenses. Anyone can simply store or withdraw reserves according to clear

principles. One such rule is consistent item pronunciation  $x * y = k$ . where  $x$  and  $y$  hold for two tokens A and B. To extract a specific sum from Token A, you want to store the corresponding sum from Token A and Token B holds a specific value of  $k$  before charging.

## Multi-level Staking mechanism

Our token framework is a combination of various pools on numerous blockchains, offering superior APR for simply holding HIPPO tokens. We reward HIPPO and other image tokens for staggered tokens, which will make sense later.

# TRANSFER TAX AND BUYBACK MECHANISM

Our exchange fees are basically lower than other ranches. It intends to compensate for the absence of reference procedures, but it also means full expansion. All exchanges performed by HIPPO (transmission, trade, agriculture, etc.) rely on an exchange fee of 0.5%. The 0.5% exchange fee is directly consumed in each exchange to repurchase hippo inu tokens, and its liquidity is directly guaranteed.

# TRANSPARENT BUYBACK

Many other collecting homesteads try to trick you by spending tokens on buybacks. This is useless and can be considered a trick. Allow me to understand why. Suppose you have 50 BUSD tokens and 50 BNB tokens in your pool. The value of 1 BNB is currently 1 BUSD. Suppose someone sells 10BNB for 10 BUSD, 40 BUSD and 60BNB and will stay in the pool. The current value of 1BNB is  $40/60$ , about \$670 million, which is less than the starting cost. Spending tokens outside of a liquidity pool does not change any imagined costs. Here's a stunt that different ranches use to motivate you Put away the cash. These tokens are usually minted or diffused by directors prior to listing. Applications are delivered to the general population. However, they seem worth the effort and they are not. This ended up being a very famous strategy. By chance If you notice something like this, decide over the phone. However, imagine a scenario where tokens are bought back and spent? Assuming someone buys 20 BNB for \$13.4 billion, that means there are 40 BNB in the pool and \$53.4 billion, and the cost of 1 BNB is currently around \$1.3 billion.

At the moment, you're probably thinking about what might happen if someone sold those tokens again. This is where the consumption comes from. Tokens purchased from Pull will be burnt so they cannot be exchanged

# FEATURES

## Governance

Governance is an irreplaceable requirement for any type of institution, association or authority as they fill in size and welcome more members; like our venture. At its center, the implicit principle of governance is the help of members and their arrangement of interests, thereby promoting the long-term manageability of the association. Using Hippo Dog Tokens, our Executive Stage will enable you to make investigations and decisions that benefit the Convention including fundamental changes to the way we work, make an impact on the stage to generate revenue, change momentum, and impact the world for the betterment of things.

## Multi-chain Staking

Hippo Inu is the first multi-fastening tagging convention pinned to image tags. With a multi-chain innovation to the organization, its local individuals will actually want to stake any image of the Hippo Dog token on the token pool. It will be a true tokenized token in the form of all image currencies utilizing comparison technology.

Each image token will be organized in. While having a separate token pool, clients can stake HIPPO as a transaction - closed image currency standard type.

## Stake and Earn

### ❖ Staking Pool 1

Put HIPPO to get prizes in HIPPO

APY is 110,244.30%

### ❖ Staking Pool 2

Put HIPPO to get prize in Doge

APY is 179,546%

### ❖ Staking Pool 3

Put HIPPO to get a prize in Shib

APY 为 107,310%

### ❖ Staking Pool 4

Put HPPO to get prize in Akita

APY is 157,680%

## NON-FUNGIBLE TOKEN

Hippo Inu provides vibrant NFTs to its local individuals. It joins the Bep20 innovation on Binance Smart Chain to convey great NFTs. According to the quality events of the characters in the NFT, its NFT is divided into many categories. Therefore, an order was formulated in which holders of uncommon NFTs are more suitable relative to partners with NFTs with normal properties.

## Meme NFTs

In addition to offering normal NFT cultures on tissues, Hippo Inu also offers image NFT cultures where customers can convert their image content into image NFTs. In addition, this stage also provides NFT tokens. Local individuals can stake their NFTs instead of tokens in the token pool and on the NFT or currency form. Hippo Inu also offers NFT exchanges in multiple stages to provide access to larger and more diverse crypto business centers for its customers.

## UTILITY TOKEN

Hippo Inu utility token is \$HIPPO. Native tokens of the Hippo Inu stage, used as cash All passed. All installments and prizes on stage are \$HINU. Another intriguing component about \$HIPPO is that it will support any new tokens created on stage to enable the Binance smart chain environment, strengthening \$HIPPO locally.

## ROADMAP

### Q2.1, 2022

- website creation
- white paper
- social media awareness

- NFT creation
- Implement smart contracts

## Q2.2, 2022

- Smart Contract Audit
- Pre-sale
- public listing
- CMC&CG Listing
- On-site Staking
- Governance
- Marketplace

## Q3, 2022

- CEX Listing
- Cross-chain Staking
- strategic partnership
- NFT Minting
- Mobile App (Beta)
- Double Audit Smart Contracts

## Q4, 2022

- Farming and Staking of NFTs
- Cross-chain NFTs
- Create your own meme token
- Mobile App (Mainnet)

# TOKENOMICS

- ★ Liquidity + Pre-sale — 50%
- ★ Staking reward — 30%
- ★ CEX Listing — 12%
- ★ Dev Found — 3%
- ★ strategic partnership — 2%
- ★ Marketing — 2%
- ★ adviser — 1%

## MISSION AND VISION

Our core goal is to provide superior execution trading at the heart of the Binance Smart Chain. Our accomplices and groups adapt our means to provide first-class support to our local individuals.

The Hippo Inu population is a large solitary-family with a steadily growing series of occasions. Our network guarantees high security to our local individuals from outsiders.

**THANK  
YOU!**
